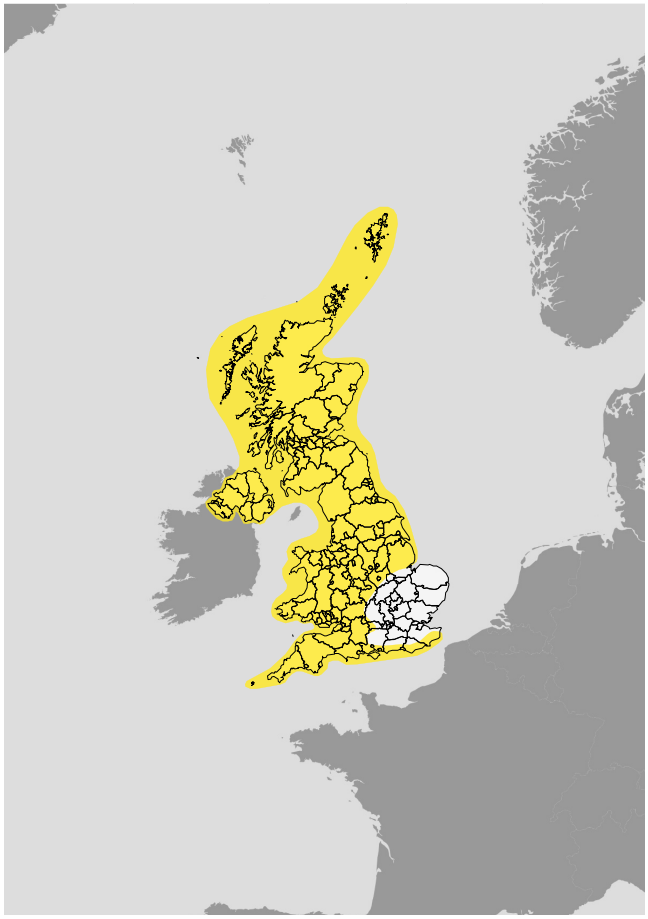
Yellow warning
Wind

Between
00:00 Fri 24 Jan 2025 and
23:59 Fri 24 Jan 2025



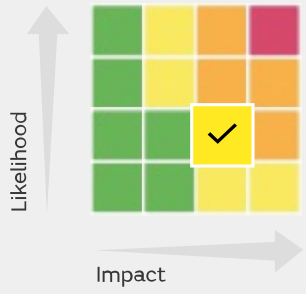
Storm Éowyn is expected to bring very strong winds and some disruption on Friday

What to expect

- Power cuts are likely to occur, with the potential to affect other services, such as mobile phone coverage
- Injuries and danger to life could occur from flying debris, as well as large waves and beach material being thrown onto sea fronts, coastal roads and properties
- Road, rail, air and ferry services are likely to be affected, with longer journey times and cancellations possible. Some roads and bridges may close.
- Some damage to buildings, such as tiles blown from roofs, could happen

Further details

Storm Éowyn will move across the northwest of the UK on Friday, clearing to the northeast on Friday night. This will bring a spell of strong winds, initially south to southeasterly before turning west to southwesterly, with peak gusts of 50-60 mph inland, 60-70 mph around some coasts and hills, and perhaps up to 80 mph in exposed parts of western Scotland. It should be noted that there may be a slight reduction in wind strength for a time as the centre of Storm Éowyn passes overhead, this most likely in parts of Northern Ireland and Scotland, before winds rapidly increase again. The wind strength will gradually ease across southern areas later on Friday.



Low likelihood of medium impacts

Further Details (continued)

What Should I Do?

Prepare to protect your property and people from injury. Check for loose items outside your home and plan how you could secure them. Items include; bins, garden furniture, trampolines, tents, sheds, and fences.

Give yourself the best chance of avoiding delays by checking road conditions if driving, or bus and train timetables, amending your travel plans if necessary.

People cope better with power cuts when they have prepared for them in advance. It's easy to do; consider gathering torches and batteries, a mobile phone power pack and other essential items.

If you are on the coast, stay safe during stormy weather by being aware of large waves. Even from the shore large breaking waves can sweep you off your feet and out to sea. Take care if walking near cliffs; know your route and keep dogs on a lead. In an emergency, call 999 and ask for the Coastguard.

Be prepared for weather warnings to change quickly. When a weather warning is issued, the Met Office recommends staying up to date with the weather forecast in your area.

Reason for update

Warning area expanded to cover parts of the UK already under a separate Amber warning for the period before and after the Amber warning is valid for.
